

ABOUT ME

Full Stack Developer & Computer Science Undergraduate specializing in building production-ready applications across multiple tech stacks, including MERN, PERN, and SERN. Proven track record of owning features end-to-end, from scalable API design to high-fidelity frontend delivery. With 3 internships and 10+ full-stack projects, I bring a data-driven approach to health-tech, career-tech, and administrative solutions. Beyond technical expertise, I am a seasoned Event Coordinator with experience managing large-scale operations and cross-functional teams for flagship college events.

EDUCATION

- **SRM Institute of Science and Technology**, Ramapuram, Chennai **Aug 2021 – May 2025**
Bachelor of Technology – Computer Science and engineering with specialization in Big Data Analytics **CGPA: 8.93**

SKILLS

- **Languages and Frameworks:** Python, JavaScript, SQL, HTML, CSS, C, React, Node.js, Express, Django, Next.js, Typescript, React Flow
- **Tools & Technologies:** MongoDB, Docker, Git, GitHub, Power BI, Google Colab, Hostinger, Vercel
- **Soft Skills:** Leadership, Time Management, Communication

EXPERIENCE

- **Full Stack Developer Intern** **Nov 2025 – Jan 2026**
Upstride | React.js, Node.js, Express.js, MongoDB, HTML, CSS, Git *Chennai, India*
- Engineered end-to-end features for a real-time tracking and analytics platform tailored for the pharmaceutical industry.
 - Developed interactive frontend dashboards using React.js, enabling data-driven decision-making through clear visualization of pharmaceutical metrics.
 - Optimized backend services and APIs using Node.js and Express.js to handle real-time data persistence in MongoDB.
 - Collaborated within a cross-functional team via GitHub, participating in code reviews and iterative releases to maintain highquality production standards.
- **Web Developer Intern** **July 2025 – Aug 2025**
Triland Animation Studio | React.js, Mongo DB, HTML, CSS, Gsap *Chennai, India*
- Architected responsive frontend components for the official company website, prioritizing smooth user interactions and cross-device compatibility.
 - Implemented high-fidelity visual elements, including parallax effects and GSAP-driven animations, to elevate the digital brand experience
 - Bridged the gap between design and engineering by coordinating with UI/UX teams to deliver interactive features under strict production deadlines.

PROJECTS

- **HIREDD** | *Supabase, React, Node.js, Express, TailwindCSS* | GitHub
- Architected a full-stack career platform featuring AI-driven roadmap analysis to provide personalized learning paths for students.
 - Developed a dual-portal system supporting 10 student-centric requirements and 6 specialized company-side features for recruitment and engagement.
 - Implemented a high-performance backend using Supabase for real-time data handling and authentication.
 - Applied a minimalist UI/UX philosophy using TailwindCSS, prioritizing clean lines, dull color palettes, and high scannability over rounded corners and bold fonts.
- **NutriTrack** | *Node.js, Express.js, PostgreSQL, React, TailwindCSS, Machine Learning* | GitHub
- Engineered a data-driven nutrition monitoring system focused on the Indian context, utilizing a normalized dataset derived from ICMR–NIN (IFCT 2017).
 - Architected a modular backend using a layered design pattern (Routes, Controllers, Services) in Node.js to ensure high maintainability and separation of concerns.
 - Implemented a robust Relational Database schema in PostgreSQL, cleaning and normalizing complex food composition data into optimized tables for efficient querying.

EXTRACURRICULAR

- **Department Secretary | TEXUS'26:** Directed departmental operations and a month-long volunteer effort to coordinate flagship events for over 100+ participants.
- **Winner (Track) | ORIGIN Hackathon:** Secured 1st place for an AI-driven Education-to-Industry bridge system, earning a direct industry internship offer.
- **Runners Up | Iliziam'25 Frontend Competition:** Earned 2nd place and a cash prize for designing a responsive landing page under a strict 3-hour time constraint.
